Simultaneously, the report provides revenue forecasts for four regions and more than twenty major countries across Asia-Pacific, LAMEA. North America, and Europe.

Thyroid cancer Market

COVID-19 scenario analysis:

At the early phase of the COVID-19 pandemic, there was no availability of specific diagnostic tests to detect the disease in patients. Alternative diagnostic tests were used initially but were not much effective. This unavailability of specific COVID-19 diagnostic tests presented lucrative opportunities for diagnostic manufacturers to introduce their COVID-19 diagnostic kits. Many leading players as well as some start-ups from various countries utilized this opportunity and introduced COVID-19 diagnostics kits into local as well as global markets. These players achieved edge over other diagnostics players capitalizing the opportunity from demand for COVID-19 diagnostic tests, which, in turn, helps them in maintaining their revenues in such a crisis.

Owing to such factors, COVID 19 is expected to have a significant impact on the Thyroid cancer market.
