The study digs deep into aspects such as market segmentation, key driving forces, opportunities and threats for the forecast period of 2021-2027. To help business strategist strengthens their strategic planning and executes a plan to maintain and gain a competitive edge the research weighs up on buyer preferences, gross margin, profit and sale across different regions. Strong

focus on financial competency, strengths, and weaknesses of the companies and recent acquisition and merger speaks a lot about the future adjacencies around the core business due to the ongoing development in the Personal Care Ingredients market.

Further Key Highlights

In June 2019, siHealth Ltd., a U.K.-based healthcare company, collaborated with BASF SE, which included an equity investment. This collaboration is expected to help BASF solely deliver satellite and optronic technologies to the global personal care industry. The collaboration is expected to extend the offerings of BASF and help in the development of new solutions.

The skincare segment held the largest market share of 39.2% in 2019. Increasing demand for anti-aging ingredients among elderly population for attaining rejuvenated skin is driving the utilization of personal care ingredients in skincare applications.

The conditioning polymers segment is anticipated to expand at the most rapid CAGR of 5.5% during the forecast period. Rising demand among consumers for safe, multifunctional, and natural ingredients is expected to drive the conditional polymers segment in the near future.
