

Drafting Services Industry Insights show benefits from increasing demand for CAD services

The Business Research Company's Drafting Services Global Market Report 2022 - Market Size, Trends, And Global Forecast 2022 - 2026

LONDON, GREATER LONDON, UK, January 13, 2022 /EINPresswire.com/ --

The growing demand for computer-aided design (CAD) services is expected to propel the growth of the [drafting services market](#). Computer-aided design includes the design and drafting of objects, goods, or structures using computer technology. Owing to the tremendous benefits that CAD provides to real estate developers, architects, interior designers, and consumers, CAD outsourcing has proven particularly relevant in the sector of architecture and building design. Therefore, the growing demand for CAD services drives the growth of the drafting services market.

Drafting Services Global Market Report 2022 - Market Size, Trends, And Global Forecast 2022 - 2026

The global drafting services market size is expected to grow from \$4.69 billion in 2021 to \$5.33 billion in 2022 at a compound annual growth rate (CAGR) of 13.6%. The growth in the global drafting services market revenue is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The drafting services market is expected to reach \$8.40 billion in 2026 at a CAGR of 12.0%.

3D printed buildings is a key trend gaining popularity in the drafting services market. A 3D printer can support the design and construct of the entire building. This method is more eco-

friendly, cost-effective, and time-efficient in printing buildings than other traditional methods. A digital 3D design of an object is produced either by a computer-aided design (CAD) or by a 3D scanner. In January 2020, Zortrax, a Polish manufacturer of 3D printers and filaments for SMB, launched a 3D printing service that utilises the full product portfolio of the company. Customers that want to use 3D printing but can't afford purchasing a machine and using it in-house will be able to obtain produced parts for prototyping, tooling, or end-use product applications.

Major players with drafting services market shares are Vegacadd, Creative Drafting, Tier 1 Utility Design, VIATechnik, LLC, Curtainwall Design Consulting, CFI Engineering, Aedas, MatkinHoover Engineering & Surveying, Duenas Camacho & Associates and Gray Design Group.

TBRC's global drafting services market growth report is segmented by service type into mechanical drafting services, site drafting services for civil engineering projects, structural components of buildings drafting services, architectural drafting services, drafting of as built drawings, drafting consulting services, others, by end-user into education, healthcare, hospitality, industrial, residential, others, by provider into large enterprise, small and medium enterprise.

Drafting Services Global Market Report 2022 - By Service Type (Mechanical Drafting Services, Site Drafting Services For Civil Engineering Projects, Structural Components Of Buildings Drafting Services, Architectural Drafting Services, Built Drawings, Drafting Consulting Services), By End-User (Education, Healthcare, Hospitality, Industrial, Residential), By Provider (Large Enterprise, Small And Medium Enterprise) - Market Size, Trends, And Global Forecast 2022 – 2026 is one of a series of new reports from [The Business Research Company](https://www.thebusinessresearchcompany.com) that provides a drafting services market overview, forecast drafting services market size and growth for the whole market, drafting services market segments, geographies, drafting services market trends, drafting services market drivers, restraints, leading competitors' revenues, profiles, and drafting services market shares.
