Global Automotive Cloud Market, By Vehicle Type:

- Passenger Vehicles
- Commercial Vehicles

Global Automotive Cloud Market, Propulsion Type:

- IC Engine Vehicles

## □ Electric Vehicles

### Global Automotive Cloud Market, By Deployment Type:

- Private Cloud
- Public Cloud

### Global Automotive Cloud Market, By Application Type:

- Infotainment Systems
- Telematics
- Fleet Management
- OTA (Over the air) Systems
- ADAS (Advanced driver-assistance systems)
- Others

By accelerating innovation and enhancing the rate of business continuity, cloud computing has substantially revolutionized the way different sectors operate. Connected cars, self-driving cars, shared mobility, greater customer insights, and digital manufacturing all benefit from cloud computing. Today's vehicles are no less than supercomputers, generating vast amounts of data from the multiple sensors installed on the car to collect real-time alerts/information on tire pressure, GPS, temperature, and a variety of other aspects. This data can be evaluated in real-time in the cloud and then used for telematics, car health displays, advanced driver assistance systems (ADAS), and mobility services.
