Soft Tissue Repair Market by Type and Application: Global Opportunity Analysis and Industry Forecast, 2017-2025.

PORTLAND, OREGON, UNITED STATES, January 14, 2022

/EINPresswire.com/ -- Soft tissue injuries are trauma caused to muscles, ligaments, and tendons. Tendons are fibrous connective tissues that attach muscles to a bone. The damage caused by overstressing of muscles or tendons is known as strain. Whereas, ligaments are fibrous bands that connect bones to other bones. The injury caused due to overstretching or tearing of ligaments is called as sprain.

Factors that drive the soft tissue repair market are surge in obese population and increase in geriatric population. However, the high cost associated with soft tissue repairs and lack of reimbursement are the factors projected to restrain the market growth. Moreover, the untapped potential of soft tissue repairs in developing countries, such as India, China, and Brazil, is anticipated to create lucrative opportunities for the key market players.

Based on type, the laparoscopic instrument segment accounted for about three-sevenths share of the global market in 2016 owing to the increase in minimally invasive surgeries and laparoscopic procedures globally.
