'Clean-label' is gaining traction among fruit pectin companies, as evolving consumer demand creates growth opportunities. Fruit pectin companies are focusing on widening their product portfolio, while disseminating information about the positive impact of fruit pectin on consumer.

These insights are according to a latest research study by Fact.MR. A summary of the report is available upon request.

According to the study, demand for fruit pectin is growing across a range of industries, including bakery, beverages, pharmaceuticals, and food supplements. End-use industries are replacing some of the traditionally used materials to include more organic and healthy products in their offerings. Demand for fruit pectin is witnessing impressive y-o-y growth as a result of this. The use of fruit pectin is witnessing an increase, especially in fillings and toppings. Demand has been significant for Citrus Pectin Powder, and apple pectin. In fact, according to research, global consumption of fruit pectin reached 10,000 tonnes in 2018. The gains were led in part by evolving consumer preferences as well as FDA's guidance that certain non-digestible carbohydrates be termed as dietary fibers.

Applications of fruit pectin is growing extensively in jams, jellies, and confectionaries. Manufacturers using fruit pectin as an ingredient are touting the health benefits of their products to appeal to a wider consumer base. According to the report, in terms of Citrus Pectin Powder source, oranges continue to be the preferred fruit, on the basis of their availability and ease of formulation.

In addition to oranges, tangerines and mandarins are the other widely used fruit pectin globally. Europe continues to be one of the most lucrative markets for fruit pectin, with two-fifth of global citrus penetration in 2018. The clean label and natural food trend is likely to provide an impetus to the growth of fruit pectin market in Europe.

In addition to North America and Europe, demand for fruit pectin is also likely to gain ground in Asia Pacific. Many countries in Asia Pacific are witnessing the emergence of a strong middle class, which is ramping up demand for health and wellness products. Although the average awareness and spend on fruit pectin is relatively lesser in Asia Pacific, as compared the US and Europe, the high population is working to the advantage of manufacturers.

The fruit pectin marketplace remains moderately consolidated, with top players accounting for a majority share in the market. The players are focusing on improving their distribution networks and expanding into countries where fruit pectin is easy to source. Considering the bullish growth prospects in the fruit pectin market, it is highly likely that manufacturers will continue to focus on expansion strategies.
