

Liquid Biopsy Global Market To Grow At Rate Of 31% Through 2026

The Business Research Company's Liquid Biopsy Global Market Report 2022: Market Size, Trends, And Forecast To 2026

LONDON, GREATER LONDON, UK,
January 17, 2022 /EINPresswire.com/ --

According to '[Liquid Biopsy Global Market Report 2022](#) - Market Size, Trends, And Global Forecast 2022-2026' published by The Business Research

Company, the liquid biopsy market size is expected to grow from \$4.02 billion in 2021 to \$5.17 billion in 2022 at a compound annual growth rate (CAGR) of 28.5%. The growth in the market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The liquid biopsy market is expected to reach \$15.01 billion in 2026 at a CAGR of 30.6%.

The liquid biopsy market consists of sales of liquid biopsy services and related products used to detect cancer at an early stage. Liquid biopsy is an easy and minimally invasive technology which involves test done on a blood sample to detect the DNA from tumour cells in the blood. Unlike surgical biopsies it allows medical doctors to find a tumour through a blood test. The liquid biopsy helps in planning further treatment for cancer.

[Global Liquid Biopsy Market Trends](#)

Companies are rapidly adopting new market dynamics and focusing primarily on new product launches, to meet the ever-increasing need for liquid biopsy products and services, to increase their revenue and also for gaining a competitive edge over their rivals.

Global Liquid Biopsy Market Segments
