Bell's Palsy Diagnosis and Treatment Market - Introduction

Bell's palsy is a severe weakness or paralysis of the nerve that controls the facial muscles on the both side of the face. General signs of Bell's palsy are weakening of muscles on any side of the face, loose mouth or eyelid on one side, or dribbling from one side of the mouth. Several disorders such as stroke, Lyme disease, myasthenia gravis, and brain tumor can cause Bell's palsy or facial paralysis. Bell's palsy is the most common cause of acute facial nerve paralysis and is the most common acute mono-neuropathy (a disorder involving only one nerve).

Bell's palsy is also known as an idiopathic unilateral facial nerve paralysis. In few cases, less than 1%, Bell's palsy can occur jointly causing entire facial paralysis. An inflammatory situation leads to inflammation of the face nerve. The facial nerve compression and swelling in the narrow bone canal could lead to nerve damage, inhibition, or death.

Bell's Palsy Diagnosis and Treatment Market - Competition Landscape

Boston Scientific Corporation

Boston Scientific Corporation develops, manufactures, and markets medical devices utilized in a broad range of interventional procedures worldwide. It offers over 13,000 products in medical specialties such as urology, cardiology, pulmonology, neurology, gynecology, orthopedic, endoscopic, intervention radiology, and vascular surgery. Bell's Palsy Diagnosis and Treatment Market – Market Dynamics

Increasing Reimbursement for Cardiologic Anomalies (Facial paralysis, Bell's palsy, etc.) are likely to Drive the Market.

The global Bell 's palsy diagnosis and treatment market is majorly driven by the high prevalence of cardiovascular diseases, cumulative inflammation rates, growing rate of strokes, the launch of technically advanced devices, and growing penetration by market players. Moreover, factors such as government initiatives and support, and increasing reimbursement for cardiologic anomalies are likely to drive the Bell's palsy diagnosis and treatment market.

Lack of Awareness is Expected to hamper the Bell 's palsy Diagnosis and Treatment market in Emerging Economies

The major restrains of the global Bell 's palsy diagnosis and treatment market are lack of awareness and low availability of treatment in emerging economies such as Colombia, Brazil, Chile, Hungary, India, Indonesia, Malaysia, Peru, Mexico, Philippines, South Africa, Thailand, Russia, and Turkey.
