The Air Cushion Plastic Protective Packaging market is projected to exceed 9 million tons in 2019, according to a new study by Fact.MR. Air Cushion Plastic Protective Packaging industry continues to remain influenced by various factors that range from focus of manufacturers on streamlining and optimization of Air Cushion Plastic Protective Packaging, to advancements in plastic properties in line with reduced waste.

Consumer inclination toward online shopping has witnessed a dramatic rise in recent years, which in turn has boosted growth of the ecommerce sector significantly. Sensing the role of protective packaging the overall end-user experience, leading players in the Air Cushion Plastic Protective Packaging market are focusing on easy-to-use designs, along with consistent branding activities.

The study finds that Air Cushion Plastic Protective Packaging market players are moving ahead of the one-size-fits-all approach, directing their focus toward offerings solutions that suit well with unique physical properties of goods, along with developments in characteristics.

Constant rise in the ecommerce sector has also meant that the Air Cushion Plastic Protective Packaging manufacturers are putting more efforts on new product developments and innovations. Key online retailers are using automated packaging machines to integrate air cushions in package, while, small businesses with limited access to shipping and major distribution facilities are using plastic mailers due to the cost-efficiency.

According to the report, the demand for stretch wrap will remain relatively larger in light of its better recyclability and dust, moisture and tamper resistance. Sales of the LDPE resin-based stretch wrap are expected to close in on 3 million tons in 2019, which can be attributed to their amenability to heat shrinking, and high clarity. Moreover, better resistance to impact, moisture, and chemicals, along with recyclability has resulted in the wide application of LDPE resin in production of stretch wrap. Meanwhile, in recent years, the use of LLDPE resin has also increased in Air Cushion Plastic Protective Packaging as it is a cost-effective alternative, and offers high strength in various conditions.

### Competitive Landscape

The global Air Cushion Plastic Protective Packaging market is highly competitive in nature. The global reach of well-established market players and high capital investment for entering the market has created barriers for new market players.

Smurfit Kappa has announced the opening of a new International Safe Transit Association (ISTA) certified lab at its new e-commerce packaging facility in Northampton, UK.

This brings with it an expansion of Smurfit Kappa's network of packaging testing labs and centers

that support retailers and producers to develop, test, and launch disruptive packaging solutions for e-commerce at minimal risk and with reliable implementation.
