“

The COVID-19 outbreak has caused a decline in the growth of the global industries creating a mass disruption for buyers as well as sellers.”

Shankar Bhandalkar

The supreme importance of health and occupational safety is expected to boost the growth of the surgical hat market to remain profitable. The surgical hat product market is expected to experience growth owing to the rise in awareness regarding the wide range of surgical hats in a variety of designs, styles, and material.

Surgical hat is an integral part of hospitals for maintaining hygiene and prevent from infection transmission. It helps

in preventing the risk of infection and transmission of deadly virus, ailments, and blood borne diseases. The surge in the widespread presence of chronic diseases and rise in number of immune compromised patients drive the growth of the surgical hat industry. In addition, there

has been an increase in the number of hospitals and health infrastructure, which fuels the market growth.

The Association of periOperative Registered Nurses (AORN) which is a professional organization that facilitate management, teaching and perioperative research and practice of perioperative nursing and represent more than 41000 registered nurse in united states and abroad, has issued some guidelines regarding usage of surgical hats and protective clothes. They issued draft in which it was recommended to the medicalhealthcare professionals to wear surgical hats and other protective covers that should cover scalp, hair, beard while entering into the restricted and semi-restricted areas. And they planned to publish the guidelines in June 2020.
