“

This extreme situation has meant that consumers' interest in the necessary products and services has been shifted to help them survive. Entertainment or leisure interests were not visible.”

*Shankar Bhandalkar*

Drums can help alleviate grave conditions such as stress, anxiety, chronic pain, mental illness, fatigue, dependence, and hypertension. Drum play also helps improve the mood and releases endorphin and alpha waves into the brain that help a person recover. It helps achieve complete relaxation and reduces stress hormones in the body. People with stress and mental fatigue can undergo therapy. Due to this prolonged pandemic, the degree of tension and anxiety has grown in persons. People may now pick a drum to relax and return to a better position to

their typical routine.

The school is the largest engine of development since they give pupils from a very early age musical instruction and many of them take their careers as music schools. Whereas on the other hand, music corporations and artists influence people via their music and individuals choose to study and perfect the tool's ability to perform. Thus, these two reasons might promote the expansion of the market for electronic drums. The post-COVID period will be the vital phase, as firms must encourage positively having a strong consumer influence.

Since the covetous situation in many countries is easing and lockdowns are constrained, people want to go back to their usual routines and enjoy as before. This opportunity provides the electronic drum market with an excellent chance to encourage their product and increase sales positively. Consumers can be assured and encouraged to purchase the product with positive promotion.
