Renovation of old bathrooms and kitchens in residential and non-residential buildings and new construction projects are driving the plumbing components market. Also, damaged or broken components are also needed to be replaced and thus, increase the sales of plumbing components. Further, some of the renovation work is also done when the houses, bungalows or flats are sold and the new owner wishes to redecorate the house.

Moreover, the global COVID-19 pandemic has made a negative impact on the construction industry. Many of the new construction and renovation projects were put on hold.

Manufacturing and transportation has been affected which has eventually created negative trend on the global plumbing components market in 2020.
