

# Digital Radiography Market to Reach upto USD 7,138.6 Mn by 2028 | GE Healthcare, North Star Imaging, Fujifilm Holdings

SEATTLE, UNITED STATES, UNITED STATES, January 19, 2022 /EINPresswire.com/ -- New Research Study "[Digital Radiography Market](https://www.coherentmarketinsights.com/insight/request-sample/151) 2022 analysis by Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges and Investment Opportunities), Size, Share and Outlook" has been added to Coherent Market Insights.

The only difference between digital radiography and conventional radiography is that the former uses a phosphor image plate instead of a conventional film. Currently, medical device and equipment manufacturers offer a variety of digital imaging solutions to their customers based on various detector and readout technologies. Several factors are positively influencing demand for digital radiography, including the archiving of a fully digital picture and communication system, in which images are stored digitally and can be shared without the risk of file loss during image distribution in hospitals via web-based technology. This is expected to benefit the digital radiography market during the forecast period.
