

Strategies For Global Revenue Cycle Management Software Market Players In 2022-2026 Market Forecast Period

*The Business Research Company's
Revenue Cycle Management Software
Global Market Report 2022: Market Size,
Trends, And Forecast To 2026*

LONDON, GREATER LONDON, UK,
January 19, 2022 /EINPresswire.com/ --
According to 'Revenue Cycle
Management Software Global Market
Report 2022 – Market Size, Trends, And
Global Forecast 2022-2026' published

by The Business Research Company, the revenue cycle management software market size is expected to grow from \$41.72 billion in 2021 to \$46.14 billion in 2022 at a compound annual growth rate (CAGR) of 10.6%. The growth in the market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The [RCM software market](#) is expected to reach \$69.16 billion in 2026 at a CAGR of 10.6%. The rise in the number of hospital and outpatient visits is expected to drive the revenue cycle management software market growth.

The revenue cycle management software market consists of sales of revenue cycle management software services by entities (organizations, sole traders and partnerships) that provide revenue cycle management, which is the financial process, utilizing medical billing software, that healthcare facilities use to track patient care episodes from registration and appointment scheduling to the final payment of a balance. Only goods and services traded between entities or sold to end consumers are included.

Global Revenue Cycle Management Software Market Trends

Incorporating artificial intelligence (AI) in revenue cycle management software is shaping the

revenue cycle management software market. Major healthcare analytics leaders are actively implementing or planning to execute an AI strategy that will help make decisions faster and reduce operational expenses.
