

# Pharmacy Automation Market is Booming to Grow at a 8.1% CAGR by 2028 | Becton, McKesson Corporation, Yuyama, Omnicell

SEATTLE, UNITED STATES, UNITED STATES, January 19, 2022 /EINPresswire.com/ -- New Research Study "[Pharmacy Automation Market 2022 analysis by Market Trends \(Drivers, Constraints, Opportunities, Threats, Challenges and Investment Opportunities\)](#), Size, Share and Outlook" has been added to Coherent Market Insights.

Pharmacy Automation

Pharmacy automation is the process of automating the processing and delivery of pharmaceuticals in a hospital pharmacy or a retail pharmacy. Counting small objects such as tablets or capsules, measuring and mixing powders and liquids for compounding, tracking and updating customer information in databases such as personally identifiable information (PII), drug interaction risk detection, medical history, and inventory management are all examples of pharmacy automation.

For more information, contact us at:

Becton, Dickinson and Company, McKesson Corporation, Yuyama Co., Ltd., Omnicell, Inc., ScriptPro LLC, Cerner Corporation, Capsa Healthcare, Baxter International, Inc., KUKA AG, TCGRx Pharmacy Workflow Solutions, RxSafe, LLC, ARxIUM Inc. Swisslog Holdings AG and Talyst systems LLC

A major element driving pharmacy automation market expansion is the growing requirement to eliminate medication errors and the development of automated systems with improved features. The National Coordinating Council for Medication Error Reporting and Prevention (NCC

MERP) estimates that 0.1 million individuals die each year as a result of medical errors in hospitals.

Similarly, according to a 2014 Institute of Medicine survey, drug errors are responsible for 1 out of 131 outpatient and 1 out of 854 inpatient deaths worldwide each year. Furthermore, according to World Health Organization (WHO) studies from 2016, 12 percent of primary care patients in the United Kingdom are affected by monitoring or prescribing errors of medicine over the course of a year, and this number rises to 31% in older patients 75 years and older who receive more than 5 drugs over the course of a year.

Furthermore, the danger of infectious disease transmission is a major worry with injectable product errors. According to the World Health Organization, in 2008, improper medical injections resulted in 340,000 HIV infections, three million cases of bacteremia, and 15 million cases of hepatitis B.

In-depth analysis of statistics on current and emerging trends provides clarity regarding Pharmacy Automation Market dynamics. The report includes Porter's five forces to analyze the importance of various characteristics such as understanding of suppliers and customers, risks posed by various agents, competitive strength, and promising emerging businessmen to understand a resource. Precious. Further, the report covers the Pharmacy Automation research data of various companies, benefit, gross margin, global market strategic decisions, and more through tables, graphs and figures. Infographics.

Reasons to Buy this Recombinant Protein Market Report

- Save time carrying out entry-level research by identifying the size, growth, and leading players in the emerging Pharmacy Automation market
- Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the emerging Pharmacy Automation market
- Leading company profiles reveal details of key Pharmacy Automation market players emerging five operations and financial performance
- Add weight to presentations and pitches by understanding the future growth prospects of the emerging Pharmacy Automation market with five year historical forecasts
- Compares data from North America, South America, Asia Pacific Europe and Middle East Africa,

alongside individual chapters on each region .

The following are the study objectives for this report:

- SWOT Analysis focuses on worldwide main manufacturers to define, assess, and analyse market competition. By kind, application, and region, the market is defined, described, and forecasted.
- Examine the global and main regional market potential and advantage, opportunity and challenge, constraints and risks.
- Determine whether trends and factors are driving or limiting market growth.
- By identifying high-growth categories, stakeholders would be able to analyse market potential.
- Conduct a strategic study of each submarket's growth trends and market contribution.
- Expansions, agreements, new product launches, and acquisitions in the market are all examples of competitive developments.
- To create a strategic profile of the main players and analyse their growth plans in depth.
