Increase in number of hospitality industries, schools, and universities are expected to further propel the demand for commercial steamers worldwide. A change in the method of cooking is one of the factors that increases the demand for commercial steamer.

Enhancement of food safety, quality regulations, and rise in health-conscious people, are expected to drive the

growth of the commercial steamer market. Commercial steamers require a high level of maintenance which hinders the growth of the steamer market.

In contrast to fried and roasted food items that increase the risk of particularly heart-related diseases, steamed food products are believed to be beneficial. Demand for steamed food products has steadily increased as steamed food products are related with many health benefits such as better digestion, retention of vitamins, and minerals that work as antioxidants for the skin, and decreases capacity of cholesterol. Steamed food also retains the natural flavors and nutrition.

North America retains a major share in the commercial steamer market because these regions have advanced technology, infrastructure, and urbanization. Asia-Pacific is anticipated to exhibit the fastest growth due to increase in number of restaurants, as the hospitality industry is the key customer for commercial steamers, which makes the adoption of the steamer a crucial factor for growth in the coming years.
