Commercial Cabin Refurbishing

Key Takeaways from Market Study

Rising demand for luxury and safety during air travel is accelerating demand for aircraft refurbishing.

Increase in aircraft interior refurbishing for first class cabins is a crucial factor accelerating market growth.

Increase in air passenger traffic from emerging regions such as Asia Pacific and the Middle East is making airlines opt for aircraft refurbishing services.

Major providers of aircraft refurbishing are investing in new technologies for unique modified designs of interiors that give an aesthetic look to interior cabins as well as increase passenger comfort during air travel.

Retrofit constitutes the highest market share, and is set to expand at a CAGR of 5.7% through 2031.

Narrow body aircraft hold a prominent market share, and the segment is slated to expand at a CAGR of 5.7% over the decade.

The aircraft refurbishing market witnessed a plunge in 2020 due to the COVID-19 pandemic, with a recorded growth of -9.7%.

The refurbishing market in France is projected to expand at a CAGR of around 4.9%, while that in the U.S. at close to 5.5%, through 2031.

The market in ASEAN and China is set to surge at CAGRs of around 7.5% and 7.1%, respectively, over the next ten years.

This report gives you access to decisive data such as:

Demand of Aircraft Refurbishing Market & Growth drivers

Factors limiting Aircraft Refurbishing market growth

Current key trends of Aircraft Refurbishing Market

Market Size of Aircraft Refurbishing and Aircraft Refurbishing Sales projections for the coming years

The report also offers key trends of Aircraft Refurbishing market and an in-depth analysis of how the projected growth factors will shape the Aircraft Refurbishing market dynamics in the coming years of the forecast period.

Moreover, it also gives meaningful as well as actionable insights on the competitive analysis of Aircraft Refurbishing Market that are developing the current market scenario and which will be lucrative for the future demand of Aircraft Refurbishing Market.

Crucial insights in Aircraft Refurbishing market research report:

Underlying macro- and microeconomic factors impacting the Sales of Aircraft Refurbishing market.

Basic overview of the Aircraft Refurbishing, including market definition, classification, and applications.

Scrutinization of each market player based on mergers & acquisitions, R&D projects, and product launches.

Adoption trend and supply side analysis of Aircraft Refurbishing across various industries.

Important regions and countries offering lucrative opportunities to market stakeholders.

What Makes Demand for Narrow Body Aircraft Refurbishing High?

Narrow body aircraft is a type of airplane that has a single aisle of seats with two to six seats per row. Many models of Boeing and Airbus have narrow body airplanes.

Narrow body aircraft are generally used for short- and medium-haul routes. These airplanes are generally used for domestic flights and need periodic refurbishing, which is contributing to rise in demand for narrow body aircraft refurbishing.

Owing to mounting demand for narrow body aircraft, their refurbishing is expected to garner an absolute \$ opportunity of nearly US\$ 1.8 Bn and projected to grow 1.7X by 2031.

What is Accelerating sales of VIP Refurbishing?

VIP aircraft refurbishment for private jet interiors and customization has been increasing since the past few years due to high demand for luxury and comfort while travelling. The interiors of VIP cabins are refurbished with modern technologies such as in-flight entertainment systems, LED lightings for greater level of style, and sophistication of aircraft interiors, along with latest styles of cabin headliners and window panels of unique designs.

VIP cabin refurbishing accounted more than 16% of all refurbishing type sales in 2021, and is estimated to rise at a CAGR of 6.7% over the decade

What are the Latest Trends of Aircraft Interior Refurbishment Impacting Sales in the Market?

In a time of rapid technological advancements, manufacturers and suppliers have adopted advanced technology to increase the business for aircraft refurbishing, which is increasing the fuel efficiency of commercial aircrafts. Increasing trend of using [3D printing](#) for aircraft interiors is adopting by many leading manufacturers for making aircraft interiors.

Aircraft manufacturer Boeing has teamed up with Oak Ridge National Lab to 3D print aircraft interior parts that will not only increase aircraft efficiency but also reduce manufacturing waste.

Growth in passenger to freighter aircraft conversions is one of the major trends being observed, thereby driving demand for aircraft refurbishment. Many airlines transform older passenger aircrafts to freighter cabins after their useful operational service as passenger aircrafts, thereby extending the economic life of the airplane.
