The retail segment is anticipated to garner the highest market share during the forecast period, due to rise in consumer awareness about stevia as a natural zero calorie sweetener, which is non-cariogenic sweetener with low glycemic index. Furthermore, health benefits associated with stevia has made it popular in the household sector. Thus, the demand for stevia especially among the diabetic and obese consumers is expected to increase significantly, thereby driving

the growth of the stevia market.

Moreover, rise in number of consumers adopting a healthy lifestyle has propelled the adoption of free form product. This, in turn, has triggered the trend of reducing the consumption of sugar in their diet, which encourages consumers to seek for healthy alternatives of sugar. This factor has urged food & beverages manufacturers to use stevia in their products, which is expected to offer potential growth opportunity for market expansion during the forecast period. In addition, stevia has been also known for improving the palatability of animal feeds, resulting in enhancing the appetite of livestock. This is anticipated to boost the demand for stevia in the animal feed industry. Furthermore, the food service industry, including cafes, restaurants, and hotels are increasingly adopting stevia as table top sweetener for tea and coffee. This, in turn, is anticipated to provide immense opportunity for the stevia market growth in the food service industry during the forecast period.

The global stevia market is segmented into form, end user, distribution channel, and region. On the basis of form, the market is classified into liquid, powder, and others. By end user, it is divided into food & beverages industry, pharmaceutical industry, retail industry, and others. Depending on distribution channel, it is bifurcated into direct channel and indirect channel. Region wise, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Covid-19 impact-

The pandemic has impacted the global stevia market moderately. The first phase of the lockdown led to shortage of raw materials and disruptions in the supply chain. However, the outbreak of Covid-19 has made people more health conscious than ever before. More and more individuals have now started consuming this natural, zero calorie, non-cariogenic sweetener as a healthy substitute of refined sugar.
