“

Digital Forensics Market by Type (Computer Forensics, Network Forensics, and Mobile Forensics), Component (Hardware, Software, and Services), and Application (Healthcare, Education, Banking)”

*Allied Market Research*

Rise in cybercrimes and security concerns, increase in insider attacks, and rapid advancement in forensic technology such as fingerprint recovery from metals drive the market. In addition, reduction in the price of forensic tools further boost the market growth. However, lack of skilled professionals and increase in complexity level of mobile and other devices restrict the digital forensics market.

To Remain ‘Ahead’ Of Your Competitors, Request For A

Digital Forensics Market

Digital forensics or computer forensics involves collecting, identifying, extracting, and analyzing evidence from digital devices such as computers, laptops, and hard disks. This type of technology is used in criminal, civil court cases, and in private organizations. This technology helps reduce employee theft particularly in banking, defense, and IT industries.

□□□□□-□□ □□□□□□□□:

- 1) The COVID-19 impact on the Digital forensics market is unpredictable and is expected to remain in force till the fourth quarter of 2021.
- 2) The COVID-19 outbreak forced governments across the globe to implement strict lockdowns and banned import-export of nonessential items for most of 2021. This led to sudden fall in the availability of important raw materials.
- 3) Moreover, nationwide lockdowns forced manufacturing facilities to partially or completely shut their operations.
- 4) Adverse impacts of the COVID-19 pandemic have resulted in delays in activities and initiatives regarding development of reliable and innovative drone analytics systems globally.
