

# Cloudbric launches AWS-only web application firewall management service

*Cloudbric announced it has launched a web application firewall management service (Managed Rules for AWS WAF) optimized for the Amazon Web Services environment*

SEOUL, KOREA, February 2, 2022 /EINPresswire.com/ -- Cloudbric (CEO, Tae-joon Jeong), a cloud security company, announced it has launched a web application firewall management service (Managed Rulesets for [AWS WAF](#)) optimized for the Amazon Web Services (AWS) environment.

AWS [WAF](#) is a web application security tool that detects and blocks abnormal traffic. It has a security rule automatic update function. In addition, It provides the [ruleset](#) service function that collects and analyzes more than 100,000 data from 95 countries every day and various vulnerability defense functions.

CEO of Cloudbric, Tae-joon Jeong said, "AWS's web security management policy requires expert knowledge because users directly need to manage rulesets, and there is a constant burden for the management of it." and "If WAF is implemented, the users will be able to minimize repetitive management tasks and reduce system maintenance costs."
