Injury, End User and Region. Simultaneously, the report provides revenue forecasts for four regions and more than twenty major countries across Asia-Pacific, LAMEA, North America, and Europe.

COVID-19 scenario analysis:

The forced lockdown caused due to the COVID-19 outbreak has led to recession globally. The decision was taken such that the spread of the diseases could be minimized, which has led to the reduction in the demand for the products mainly which are used for the surgeries. . The COVID-19 pandemic has a negative impact on the global ligament stabilizers market and significantly in the healthcare system, resulting in 50% to 70% drop in revenue from March. There are various organizations that operate on a small scale, such as nursing homes, small hospitals and others, which are forced to shut their operations and hence the reduction in the surgical procedures is observed. The growth in the use of the personal protective equipment is observed during the forecast period. The visa cancellations has also led to the lesser medical tourism and also stipulated the economic loss for the majority of the population who rely on it.
