The hospital and pre-hospital external defibrillators market is expected to grow at a significant rate during the forecast period, owing to increase in demand for automated defibrillators, surge in prevalence of chronic cardiac diseases, growth in awareness about technological advancements about automated external defibrillators in developing countries. In addition, rise in the geriatric population, and development in healthcare infrastructure further drive the market growth.

The global hospital and pre-hospital external defibrillators market is segmented based on type,

end user, and region. According to type, the market is bifurcated into manual external defibrillator and automated external defibrillator. Based on end user, the market is categorized into hospital and pre-hospital. The hospital market is further categorized as general wards, ICU, emergency room, and others. The pre-hospitals market is sub-segmented into EMS, fire department, police, private transport companies, and others. Based on region, the market is studied across Asia-Pacific, LAMEA, North America, and Europe.

Asia-Pacific offers lucrative opportunities in the defibrillators market and is anticipated to be the fastest-growing market during the forecast period. Its growth is supplemented by the rise in demand for sophisticated defibrillators, large number of healthcare reforms, high prevalence of heart failures, and increased focus of key players on developing technologically advanced cost-effective defibrillators.
