Key Market Segments Covered

By Capacity

- 1-2 MW Large Generators
- 2-5 MW Large Generators
- 5-10 MW Large Generators
- 10-20 MW Large Generators
- 20-50 MW Large Generators
- Above 50 MW Large Generators

By Fuel Type

Diesel Large Generators

Gas Large Generators

By End-Use Industry

Large Generators for Power & Utility

Large Generators for Oil & Gas

Large Generators for Marine

Large Generators for Airports

Large Generators for Construction & Mining

Large Generators for Manufacturing

Large Generators for IT & Telecom

Others

Region

North America

Latin America

Europe

East Asia

South Asia & Oceania

Middle East & Africa

SWOT analysis has been performed in the market study to investigate the strengths, weaknesses, opportunities and threats of each player, both at global and regional levels.

The latest industry analysis and survey on Large Generators provides sales outlook in 20+ countries, across key categories. Insights and outlook on Large Generators market drivers, trends, and influencing factors are also included in the study.

This report gives you access to decisive data such as:

Factors limiting Large Generators market growth

Current key trends of Large Generators Market

Market Size of Large Generators and Large Generators Sales projections for the coming years

The report also offers key trends of Large Generators market and an in-depth analysis of how the projected growth factors will shape the Large Generators market dynamics in the coming years of the forecast period.

Market Study

The large generators market is anticipated to add 1.6X value by 2031.

Large diesel generators capture a major chunk, equivalent to more than half of the global market share, and are set to create an absolute \$ opportunity of around US\$ 2.4 Bn from 2021 to 2031.

Among the end-use industries, the airports segments has been the fastest-growing one, owing increasing use of backup power systems at a majority of international airports.

North America is set to dominate market revenue in 2021, and is expected to gain 66.3 BPS by 2031.

The market in China, India, and Germany is expected to rise at around 5% CAGR each through 2031.

Due to the COVID-19 crisis, demand for large generators was hit in 2020, which saw a decline of 2.8% over the 2nd and 3rd quarters.

Country-wise Analysis

Will Does China Continue Influencing the Market Structure and Product Pricing?

China, the world's eminent market for large generators will continue to affect global prospects. China's market remains extremely fragmented with a very large number of small players competing for a shrinking pie. Some manufacturers are aiming big and looking forward to compete in the global market.

China had a global market share of more than fifty percent in 2020, which is expected to rise further by 2031. This shows the country will further its position as a leading market for large generators. Impact of rising demand from China means that manufacturers and suppliers with local know-how and expertise will benefit in a big way.

Why is Demand for Large Generators Continuously Rising across the U.S.?

The U.S. market holds a majority of the market share in North America. This is due to the fact that this region has the presence of a majority of large generator manufacturers due to easy availability of raw materials and high-end infrastructure. Also, high number of end-use industries such as oil & gas, IT & telecom, etc., is driving demand from the consumption side.

Majority of prominent players in the country have been offering rental services for end users on a project base. Such a service is very profitable for end users, as they do not have to pay for the maintenance of these large generators. However, few third-party rental service providers are actively involved in purchasing [high capacity large generators](#), and thus, are contributing towards the growing demand.
