The session initiation protocol (SIP) trunking services market consists of sales of session initiation protocol trunk and related services by entities (organizations, sole traders, and partnerships) that is offered by a communications service provider that uses the ability to give voice over IP (VoIP) connectivity between the on-premises phone system and public switched telephone network (PSTN). The SIP trunking service is used for call establishment, administration and teardown. SIP trunks are sold as a replacement for the digital primary rate interface (PRI), which is based on time-division multiplexing (TDM).

Global [Session Initiation Protocol \(SIP\) Trunking Services Market Trends](#)

Cloud-based SIP trunking service is a key trend gaining popularity in the SIP trunking service market. SIP trunking service providers offer cloud-based SIP or VoIP (Voice over IP) that can be bought and maintained virtually without any hassle. It has reduced service cost, the provider takes all the responsibility for SIP trunks, bandwidth and the best part of a cloud-based SIP trunk is that the system can be accessed from anywhere at any time.
