

# Dyco Ventures Unveils All-New Rolling Mechanic's Tool Cart

*Mobile workbench offers abundant built-in storage and outstanding flexibility with impressive reliability.*

ARCADIA, FL, USA, January 25, 2022

/EINPresswire.com/ -- Dyco Ventures brought in 2022 with a bang, unveiling its all-new rolling mechanic's tool cart at its Florida manufacturing center. This heavy-duty cart features a choice of a 4-foot-long workbench with two columns of drawers or a 6-foot-long workbench with three columns of storage drawers, all resting on sturdy wheels that enable it to go where other tool carts can't. The rolling mechanic's tool cart rounds out the product line of this industry-leading [tool storage manufacturer](#), offering a new level of versatility to mechanics and tradespeople.

Dyco Rolling Mechanic's Tool Cart

## Melding Quality and Versatility

Every rolling mechanic's tool cart is manufactured with precision and accuracy, ensuring it has decades of use. We only put products on the market that we're proud to call our own."

*Peter Dyck, CEO of Dyco Ventures*

Today's mechanics need a unique blend and durability and versatility that is missing from most workbenches and tool carts on the market. The Dyco rolling mechanic's tool cart fills this void by offering a sturdy workbench on top of multiple rows of tool storage drawers. The cart also features heavy-duty caster wheels that enable users to push it easily, even when it is filled to capacity with tools. With its workspace and storage compartments combined into a single movable apparatus, the Dyco Rolling Mechanic's Tool Cart can simplify any mechanic or tradesperson's work life.

Dyco manufactures the Rolling Mechanic's Tool Cart using high-quality steel and coats it with a durable finish, giving it both sturdiness and longevity. The steel workbench is suitable for a variety of jobs, from the quick and easy all the way up to the heavy-duty and intense.

"Every rolling mechanic's tool cart is manufactured with precision and accuracy, ensuring it has decades of use," says Peter Dyck, CEO of Dyco Ventures. "We only put products on the market that we're proud to call our own, and this meets our exacting standards."

Because Dyco understands a mechanic's need to have an array of tools within arms reach at all times, its rolling mechanic's tool cart offers 300 pounds of storage capacity per drawer. The workbench top is made of high-quality steel and sits at an ideal height for a variety of tasks. Thanks to the array of drawers found beneath the workbench, even the most disorganized mechanics can sort their tools neatly. For those who desire even more compartmentalization of their tools and equipment, Dyco Drawer Dividers fit perfectly into the Rolling Mechanic's Tool Cart drawers.

With the all-new rolling mechanic's tool cart now available for purchase, Dyco looks forward to hearing feedback and testimonials from customers.

#### About Dyco Ventures

Family-owned and operated and invested in its small Florida community, Dyco Ventures has always prioritized quality over volume, the company's owners overseeing the crafting of every product that leaves its manufacturing center. The result has been a fiercely loyal base of customers ranging from one-man-shop mechanics to local repair shops, to regional chains. With the release of its new tool cart, Dyco Ventures looks forward to growing its customer base further. Learn more about [Dyco Ventures here](#).
