Demand for Food with Improved Shelf-life Will Boost Growth

The rising demand for food with longer shelf-life is one of the chief growth drivers of the market. Dehydrating food is one of the best technologies to enhance food shelf-life and preserve it for a longer period. The method has gained popularity because it helps in reducing food wastage. As a result of this, food dehydration also is a preferred technology for preserving unconsumed food among government and non-government organizations.

Competitive Landscape

Some of the leading players operating in the food dehydrators market are Excalibur Dehydrator, Koolatron Corporation, NESCO, National Presto Industries, Inc., Hamilton Beach Brands, Inc., Lem Products Holding LLC, Tribest Corporation, The Sausage Maker, Inc., NutriChef Kitchen, LLC, Buffalo Appliances, STX International, Avantco Equipment, Vitality4Life Pty Limited, Aroma Housewares Company, and Gourmia.

As a result of increasing competition, food dehydrator manufacturers are focusing on expanding their product portfolio and improving existing technologies. Furthermore, they are using innovation to use different sources of energy to make food dehydration process more eco-friendly and reduce cost of production.
