

Ricky Blanche is back with a new release: "Dictator"

UK, January 28, 2022

/EINPresswire.com/ -- Ricky Blanche is a techno producer who has a knack for organic sounds and memorable melodies, often built with his keyboard. He recently dropped a new work titled "Dictator". This new project stands out for its original twist and unique insight into the artist's personality and flow. Ultimately, "Dictator" is a wonderful easy listening composition, with a diverse range of influences. The track was actually inspired by "The Great Dictator," the iconic Charlie Chaplin movie that has moved so many people through history. The track even features a segment from the famous speech scene that makes the movie so timeless!

This release strikes a chord (no pun intended!) for its personal approach, and Ricky Blanche is immediately impressive due to his talent as a producer. His style has a familiar, yet distinct sound that brings together a perfectly mastered combination of ideas, while still allowing his one-of-a-kind vision to shine through.

This release is a real treat, and the artist's range, coupled with his masterful compositional skills throughout, is proof that he's no one-trick pony. On the contrary, he is here to stay and give the audience more. "Dictator" is very much a balanced combination of soothing instrumental soundscapes and present melodies that won't get out of your head so easily.
