Rising Adoption of Cloud-Based Diagramming Software across Organizations

Owing to the rise in industrialization and globalization initiatives in both developed and developing countries, business activities are growing across all industries. Additionally, it has been observed that more than 75% of enterprises worldwide are planning to adopt digital transformation to have business recovery out of 2020. The enterprises are looking ahead to adopt cost-effective and collaborative solutions to accomplish their pre-determined digital goals. For instance, penetration of free and cloud-based platforms such as diagramming software is expected to gain high momentum. The cloud-based platform assists teams to track, collaborate, and possibly manage workflows. The diagramming solutions enable the end users to automate the management approval workflow process for business and release complete transparency.

The diagramming software is experiencing a rise in adoption across both large enterprises and small and medium enterprises over the years. Enterprises are adopting these solutions for various applications including flowchart, mind map, organization chart, timeline, and grant chart. The adoption of diagramming software enables to define workflow and hierarchy in a better manner, thereby offering transparency among organizations. Additionally, the diagramming software are useful for various departments of an organization. These solutions are applied across departments such as marketing, human resources, operations, and engineering. These solutions help different departments to create flowcharts, customer journey mapping, process diagrams, project mapping, and timeline diagrams. Companies such as Lucid Software Inc. and Cinergix Pty Ltd are offering different solutions for each department based on their requirements. These solutions are also able to easily collaborate on a real-time basis with the teams across remote locations. Thus, the above-mentioned factors are influencing the rapid adoption of diagramming software across enterprises, thereby contributing to the growth of the Diagramming Software market
