Chlorophyll Water® is a plant-powered purified mountain spring water enhanced with the addition of Chlorophyll, a key ingredient and the distinct green pigment in plant life.

Chlorophyll Water® [<https://ChlorophyllWater.com/>] is bottled at the source, a preserved natural resource protected from the elements by a 1,500-acre forest. The purified mountain spring water in Chlorophyll Water® is then distilled and refined through a three-part purification process, which is triple filtered (including carbon filtration), and then UV treated for purity and quality. Each bottle of Chlorophyll Water® is then fortified with additional vitamin A, vitamin B12, vitamin C and vitamin D.
