Increase in population and rise in disposable income of consumers has increased the purchasing power of the consumers, and thus encourage them to spend more on products which provide convenience and comfort to them. Rapid growth in residential construction industry and

changes in lifestyle pattern of consumers from living in joint family to nuclear family are the major factors that boost the growth of the modular kitchen market.

Modular kitchens are not only to enhance the look of the kitchen or overall house, but it is also space saving, provides convenient and efficient storage for the essential kitchen commodities

like utensils, appliances, and groceries with optimum usage of small spaces, and gives a clean look.

New products that contain improved capabilities have been launched by leading market players. They have taken necessary steps to improve accuracy of devices and overall functionality as well. One of the most popular kind of modular kitchen is island modular kitchen. This model just not gives the marvelous experience of cooking but also provides ample space for storage without visible clutter in the kitchen. It is a highly adaptable model as it gives liberty to use kitchen space as by the consumer's convenience for storage as well as for dining purpose also.

COVID-19 Scenario Analysis:

Corona virus has spread all over the world and most of the countries are adopting lockdown measures to control the spread of the virus and securing public health. All business and production activities are fully shut down except the necessary one such as food and medical sector or other, leading towards economic crisis in the country. Manufacturing and production functions are stopped which has slowed down the business and inactive trade and transportation has fully disrupted the supply chain because of which companies can face big losses in near future.
