Personal care & beauty will be the fastest-growing end-use industry for silicone fluids during the forecast period. Silicone fluids are used in personal care products, such as cosmetics, soaps, shampoo, deodorant, face cream, and makeup. They offer several functional benefits, including a rheological stable base with delivery benefits and good compatibility with other solvents, actives, and inert ingredients in the formula. They spread evenly and provide a silky and cushioning feel to the skin.

In terms of value and volume, the APAC region is projected to grow at the highest CAGR from 2021 to 2026. Emerging economies in APAC are expected to experience significant demand for silicone fluids as a result of the expansion of the construction industries due to rapid economic development and government initiatives toward infrastructural development. The growing population and rapid urbanization are among the key factors propelling industry expansion in this region.
