

# New Green Cryptocurrencies for Under \$1 in 2022

*BTC and ETH often dominates cryptocurrency investment conversations, while there are other lesser known available for pennies have just as much potential-*

STANFORD, CA, USA, February 1, 2022 /EINPresswire.com/ -- Bitcoin often dominates cryptocurrency investment conversations, with Ethereum (ETH) and other top 10 assets such as Cardano (ADA) and Solana (SOL) mentioned as well. While these coins are well established in the crypto market there are other lesser known coins available for pennies on the dollar which have just as much potential as investment opportunities and as blockchain projects in general. Here we are going to take a look at promising cryptocurrencies you can buy for under a dollar.

## Lustitia Coin

[Lustitia Coin \(IUS\)](#) is a new green and decentralized cryptocurrency, that uses Tenebrix's Script Proof of Work. The blockchain is capable of handling a high volume of transactions due to more frequent block generation. The network supports more transactions without having to change the software in the future. As a result, merchants get faster confirmation times while still having the option to wait for more confirmations when selling larger items.

The Future of Digital Payment - Green Coin

Lustitia Coin - The Futuer of Green Economy

The current price is \$0.0001 which is considered an attractive rate for future investment.

## ABOUT THE AUTHOR

Jan Pauler

Jan Pauler was introduced to cryptocurrency by fellow CryptoVantage contributor Keegan Francis in 2016 and was immediately intrigued by the use cases of many Ethereum-based cryptos. He bought his first hardware wallet shortly thereafter. He has a keen and vested interest in cryptos involving decentralized backend exchanges, payment processing, and power-sharing
