Beta glucan is a soluble fiber naturally present in the cell walls of bacteria, yeast, fungi, and some plants. It can provide several health benefits, such as lowering blood cholesterol levels, improving glycemic control, and strengthening the immune system. Consequently, it is widely used in the treatment of heart diseases, hypercholesterolemia, eczema, and diabetes.

Market Trends

The global beta glucan market is primarily driven by the rising prevalence of chronic diseases on account of population aging and sedentary lifestyles. Beta glucan is known to help the body fight certain common illnesses and strengthen the body's defenses against the harmful effects of stress. As a result, it is widely used in dietary supplements and functional foods. Apart from this, beta glucan is also used in personal care products like shower gels, shaving creams, and toothpaste on account of its soothing and moisturizing properties. The increasing demand for natural and plant-based products among consumers is further projected to propel the market growth.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
