

What is the Impact of COVID-19 Pandemic on the Liver Disease Treatment Market?

North America accounted for a majority of the liver disease treatment market share in 2020, & is anticipated to remain dominant during the forecast period

PORTLAND, OREGON, UNITED STATES, January 31, 2022 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "[Liver Disease Treatment Market](#) by Treatment Type (Antiviral Drugs, Immunosuppressants, Vaccines, Immunoglobulins, Corticosteroids, Targeted Therapy, Chemotherapy Drugs) and Disease Type (Hepatitis, Autoimmune Diseases, Non-alcoholic Fatty Liver Disease (NAFLD), Cancer, Genetic Disorders and Others): Global Opportunity Analysis and Industry Forecast, 2021–2030". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Increase in incidence of liver diseases, surge in government and non-government awareness program, and surge in geriatric population coupled with rise in alcohol consumption and poor dietary habits have boosted the growth of the global liver disease treatment market. However, strict regulatory approvals related to liver diseases treatment drugs and vaccines and resistance to antiviral drugs used in treatment of hepatitis B and C hamper the market growth. On the contrary, presence of strong pipeline products is expected to open new opportunities for the market players in the future.
