Global market for online pet food and supplies is experiencing rapid growth due to an increase in the demand for companion animals. The buying of pet food online and availing the supplies is safe and convenient to the customers and hence is acting as a driving force for the market. Change in consumer behavior, emergence of new trends, and rise in the purchasing power of individual fuel the market for online pet food and supplies. However,

prevail issues regarding the quality and nutrition of the food product and existing consumer preferences toward conventional modes of shopping restrict the market growth.

The supply of pet food online made it convenient for the customers to choose from a wide range of products such as cooked, baked, or canned food products. These gives wide range of choice to the customers along with basic and nutritional information regarding the consumption of the product, its suitability, and shelf life. Accordingly, the consumer base can simplify the mechanism of purchase, save time and get products delivered at their convenience. This amplifies the market reach as well global growth.

Keeping aside the food products segment, there are other essentials for pets that develop demand from the customers' end. These include the pet medicines, pet utensils, clothes, pet toys, and other items applied in the care and growth of pets.
