and Cab Treasure

COVID-19 scenario analysis on Taxi & Limousine Software Market:
• The COVID-19 pandemic might significantly alter mobility-related preferences of many counties across the globe. Some consumers are expected to prefer buying their vehicles rather than availing ride-hailing services due to hygiene and health-related concerns.
• Many companies have completely shut down their operations from a long time. However, after lockdown eases, they have to implement new strategies to attract targeted costumers.
• As the virus cannot be destroyed, its impact can only be mitigated. It is expected to take at least two years for a vaccine. This is projected to affect the growth of the taxi & limousine software market.

Top impacting factors: Market scenario analysis, trends, drivers, and impact analysis
Rise in shared transportation system and increase in urbanization in developed & developing economies are the substantial driving factors of the market during the forecast period. However, high initial investment requirements and data security concerns limit the market growth of the taxi & limousine software during the forecast period. Furthermore, the rise in ground passenger transportation sector is the major factor that is expected to provide lucrative opportunities in a short period.

The taxi & limousine software market trends are as follows:
Rising shared transportation system
Significant growth has been witnessed over the past few years in the renting of taxi and limousine globally as the services offered are efficient & safer for an individual. Increase in population is one of the major reasons for the escalation of taxis across the globe. Moreover, customers prefer traveling in rented vehicles, thus avoiding self-driving.

Rising urbanization in developed & developing economies
Passenger transportation has witnessed surge in the past few years across the globe due to increase in urbanization. Rapid urbanization took place due to increased industrialization across the globe. Therefore, increasing population in developing and developed economies is expected to boost the growth of the taxi & limousine software market over the forecast period.
