PORTLAND, OREGON, UNITED STATES, February 1, 2022 /EINPresswire.com/ -- [Superyacht Market](#) Outlook - 2035: A

yacht is a sail or power vessel used for pleasure, cruising, or racing. Yacht vessels have a cabin with amenities

that accommodate overnight use. Ambient lighting and focus lighting have always been an important area of super-yacht interior designers. Now with growing LED usage, multi-colored lighting can be applied to previously inaccessible spaces. Textiles/Fabrics are an important element in the interior design. Now, there is quite a lot of flexibility in customization (color and thickness) available in fabric/leather, which was just not there a decade ago. Previously, the use of glass was restricted because it was heavy. Now with better technology, glasses are being used to improve the structural styling of yachts, and not just doors and windows.
