

Natural Killer Cells Therapeutics Market Size 2021-26: Global Industry Trends, Share, Growth, Opportunity and Forecast

SHERIDAN, WYOMING, UNITED STATES, February 1, 2022 /EINPresswire.com/ -- According to IMARC Group's latest report, titled "Natural Killer Cells Therapeutics Market Size: Global Industry Trends, Share, Growth, Opportunity and Forecast 2021-2026",

The global natural killer cells therapeutics market exhibited strong growth during 2015-2020. Natural killer (NK) cells are large granular lymphocytes responsible for producing immunoregulatory cytokines. They are a type of white blood cells that act as a vital component of the human immune system. They contain small granules of special proteins such as proteases and perforin known as granzymes. NK cell therapeutics are developed through ex vivo pre-conditioning with cytokine or small molecular [drugs](#) and chimeric antigen receptor (CAR) NK. They aim at pathogenic antigens with cytotoxicity and reduce the risk of cytokine storms.

COVID-19 scenario-

We are constantly tracing and assessing the impact of the COVID-19 pandemic on the industry. These influences have been covered in our report as significant market contributors.

The global NK cells therapeutics market is primarily driven by their increasing utilization in various molecular and combination therapies for various treatments. They are used as effective therapeutic drugs in cases of cancer, liver and infectious diseases. Furthermore, the rising awareness regarding the importance of immunotherapies has increased the need for better therapeutic options and the launch of new products, which is expected to influence market

growth in the future. As a result, several research activities have resulted in the development of allogeneic NK cells with maximum therapeutic effects. They also enhance the target and extend the persistence of potent immune cells, which helps create a strong and sustained anti-cancer immune-mediated attack. Looking forward, IMARC Group expects the market to grow at a CAGR of around 15% during 2021-2026.

Competitive Landscape with Key Players:

- Affimed GmbH
- Bristol-Myers Squibb Company
- Fate Therapeutics
- Fortress Biotech Inc.
- Glycostem Therapeutics
- Innate Pharma S.A.
- Kruur Therapeutics Inc
- Athenex Inc
- Nkarta Inc.
- Takeda Pharmaceutical Company Limited
- Ziopharm Oncology Inc.

Breakup by Therapeutics:

- NK Cell Therapies
- NK Cell Directed Antibodies

Breakup by Application:

- Cancer
- Gastrointestinal Diseases
- Immunoproliferative Disorders
- Others

Breakup by End User:

- Hospitals
- Research Centers and Institutes
- Others

Breakup by Region:

- North America (United States, Canada)
- Europe (Germany, France, United Kingdom, Italy, Spain, Others)
- Asia Pacific (China, Japan, India, Australia, Indonesia, Korea, Others)
- Latin America (Brazil, Mexico, Others)
- Middle East and Africa (United Arab Emirates, Saudi Arabia, Qatar, Iraq, Others)
