

# Top Green Packaging Companies in World 2022 | By IMARC Group

*Green packaging, also called sustainable packaging, represents the utilization of sustainable materials and manufacturing techniques for the packaging of goods.*

SHERIDAN, ALABAMA, UNITED STATES, February 1, 2022 /EINPresswire.com/ --

Green packaging, also called sustainable packaging, represents the utilization of sustainable materials and manufacturing techniques for the packaging of goods. It involves the usage of biodegradable and plant-based plastics in addition to recycled molded packaging and used polyethylene bags. When compared to the conventionally used synthetic packaging solutions, green packaging has a reduced carbon footprint and is better for maintaining human and ecological health in the long run. Green packaging further limits the amount of waste and emissions generated during the manufacturing process. As a result, these packaging solutions are used across numerous sectors, including food and beverage (F&B), healthcare, personal care, etc.

Global Green Packaging Market

The [global green packaging market](#) reached a value of US\$ 232 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 319 Billion by 2027, exhibiting at a CAGR of 5.5% during 2022-2027.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

The growing awareness among consumers and manufacturers towards the importance of environmental conservation and sustainable living is among the primary factors driving the green packaging market. In line with this, the implementation of various stringent environmental regulations by government bodies and the incorporation of renewably sourced materials in manufacturing processes are further catalyzing the market growth. Moreover, several industries are including green packaging as a part of their Extended Producers Responsibility (EPR) and opting for eco-friendly packaging product variants, such as paper, glass, and metals that can be easily recycled. This, in turn, is acting as another significant growth-inducing factor. Besides this, the inflating investments in research and development (R&D) activities aimed at augmenting the production processes of these materials, such as via the development of bio-based resins, are anticipated to fuel the green packaging market over the forecasted period.

Some of Top 10 Players in the Global Green Packaging Market:

Uflex limited  
ELOPAK AS  
Amcor Limited  
DuPont  
Mondi Limited  
Ardagh Group Company  
PlastiPak Holdings
