

Dolphin Vagus Nerve Stim Receives Health Canada Approval for Treatment of Covid-19 Respiratory Distress Syndrome (ARDS)

Health Canada Approves Vagal Nerve Stimulation Therapy specifically for treating COVID-19 respiratory distress.

TORONTO, ONTARIO, CANADA, February 2, 2022 /EINPresswire.com/ -- [Center for Pain & Stress Research Ltd.](#), a bioelectronic medical research company, today announced that its Dolphin VNS device has received breakthrough approval from Health Canada as Canada's first Vagal Nerve Stimulation Therapy specifically for treating COVID-19.

The Vagus Nerve represents 80% of our bodies parasympathetic "brakes" and NATURALLY controls our breathing and anti-inflammatory responses. Vagus nerve is the ONLY natural defense against COVID-19 ARDS.

As North American COVID-19 related deaths reaching the 1 million milestone, this effective, safe & approved COVID-19 therapy SHOULD be shared by the media with the public.

Dolphin Vagal Nerve Stim Applications:

PREVENTION: Dolphin may be applied to preventatively to friends, FAMILY members or front-line workers to enhance vagal tone & improve immunity. (Home application time <15 min).

ACUTE RESPIRATORY DISTRESS: Dolphin Vagal Stim can IMMEDIATELY enhance respiratory functioning, providing a potentially lifesaving intervention into any hospital, clinical or HOME setting (applied in under <10 min/patient).

COVID-19 LONG HAUL RECOVERY: Dolphin Vagal Stim may be applied by front line workers or the suffering public to improve vagal tone/immunity and therefore reduce risk of serious COVID-19 hospitalization.

Dolphin Vagal Stim for COVID Therapy
