

# Hair Restoration Clinic Adds Key Components to Solve Hair Loss Issues

*Trichologist and nurse is creating solutions locally and nationally in the hair community*

CHESAPEAKE, VIRGINIA, UNITED STATES, February 3, 2022

/EINPresswire.com/ -- The [Trichology Nurse Suite & Wellness](#) clinic announced today that it will add both IV Hydration therapy and Intramuscular (IM) vitamin and mineral shots to its services. With the addition of these services, the clinic is the only nurse-owned and operated hair restoration and wellness clinic in the Hampton Roads area.

Trichologist Abolore Adekoya

More than 80 million Americans experience hair loss and 40% of these people are women. With hair being an important asset and confidence booster for most women, the clinic's owner and Trichologist Abolore Adekoya, continually seeks new methods for treating her patients.

"Adding specific vitamins and minerals into a patient's diet has been a part of my treatment program since I opened my practice," Adekoya said. "When I learned how IV Hydration and IM shot therapy allow these essential vitamins and minerals to be more completely absorbed into the body, I knew I wanted to add these services into my overall programs for my clients."

Every person's hair restoration journey looks different, but all start the same: with a consultation and lab work. As a nurse, Adekoya knows hair loss can be a symptom of a multitude of different health issues. As a trichologist, she specializes in finding the solution that makes sense. By combining both of her skills set, along with her love of cosmetology, Adekoya and her clinic offer Chesapeake the best answer to hair loss questions.
