

Animal and Pet Nutrition Ingredients Market Size Is Projected to Reach USD 68.1 Bn by 2031, Exhibiting a CAGR of 6.8%

Animal and Pet Nutrition Ingredients Market to surpass USD 68.1 billion by 2031 from USD 38.3 billion in 2021 at a CAGR of 6.8% in the coming years, i.e 2021-31.

PHILADELPHIA, UNITED STATE,
February 3, 2022 /EINPresswire.com/ --
Fatpos Global has released a report
titled "[Animal and Pet Nutrition
Ingredients Market](#) - Analysis of Market

Size, Share & Trends for 2014 – 2020

and Forecasts to 2031" which is anticipated to reach USD 68.1 billion by 2031. According to a study by Fatpos Global, the market is anticipated to portray a CAGR of 6.8% between 2021 and 2031. According to the report, The widespread accessibility of pet food items across a variety of platforms, such as retail stores, supermarkets, and online retailers, will help the market grow even faster. Furthermore, dogs and cats are among the most commonly adopted animals, which is one of the major factors driving market developments. The growing trend of pet parenting is feeding market demand for high-quality and premium foods; as a result, demand for phosphate is rising as it is heavily consolidated in pet food due to its numerous health benefits, including assisting in the healthy skeletal formation, nerve impulse transmission, muscle contraction, and others. The Pet Food Ingredient Market has seen an increase in demand as a result of this.

"As laws have become less stringent, the usage of cannabis in pet food treats has grown in favor. Concentrates, isolates, and synthetic cannabis-based pet food are all available. Anxiety-relieving cannabis-based food products are the most effective at reducing anxiety. CBD is also being considered by pet owners as a possible treatment for pain and allergies. The recent Global Pet Expo in Orlando included a lot of cannabis-based goods. The majority of cannabis-based pet food is sold online (via Amazon). Cannabis-based pet products have been selected as one of 2021's growth opportunities by pet entrepreneurs.", said a lead analyst at Fatpos Global.

- Other Prominent Players

Pet food is a type of plant or animal product, such as meat, that is used to feed pets. Fruits and vegetables, animal products and derivatives, grains and oilseeds, vitamins, and minerals are all included in pet food ingredients. Calcium, fiber, protein, carbs, and other micronutrients abound in pet food ingredients. Grains and vegetables are commonly used, especially in dog food. Each element contributes to the enrichment of the animal's health in some way.
