

GCC Gypsum Board Market Size 2022: Share, Price Trends, Growth till 2027 - Syndicated Analytics

GCC Gypsum Board market report provides a deep and thorough evaluation of the GCC gypsum board market based on its segments including type, end use and region.

ALBANY, NEW YORK , UNITED STATES OF AMERICA, February 3, 2022 /EINPresswire.com/ -- A gypsum board, also called drywall, plasterboard, or wallboard, refers to a lightweight construction material comprised of gypsum plaster that is pressed between thick sheets of paper. It is

extensively used in the partitions and linings of walls, ceilings, roofs, floors, etc. Gypsum boards can be directly attached to metal framings, wood, or existing surfaces by using screws, nails, adhesives, etc. They provide sound control, versatility, quality, and convenience. Apart from this, the non-combustible cores of gypsum boards make them preferable over plywood, hardboard, fiberboard, etc. As a result, they are widely popular as an efficient alternative to traditional plaster and lath.

Note: Our analysts are continuously monitoring the influence of the COVID-19 pandemic on the market. This insightful information is included in the report to improve the efficiency, resilience and overall performance of businesses.

GCC Gypsum Board Industry Trends and Drivers:

The expanding construction industry is among the primary factors driving the GCC gypsum board market. In line with this, the inflating demand for commercial and residential building projects, owing to the growing population and elevating urbanization levels, is further catalyzing

the market growth. Moreover, the escalating number of renovation and restoration undertakings for structural complexes is acting as another significant growth-inducing factor. In addition to this, the emerging trend of wood-frame construction, which uses gypsum boards as essential components, is also bolstering the market growth. Furthermore, the launch of several favorable policies by government bodies aimed at increasing gypsum imports and augmenting the utilization of existing reserves is anticipated to fuel the GCC gypsum board market over the forecasted period.
