A mouse is an integral part of the computer system and owing to its application, it becomes necessary for the customers to maintain the device by opting for protective equipment. For mouse, the protective equipment for easing its use and longevity is the mousepad. The requirement of mousepad grows with the increase in number of desktop installations in households, schools, and offices. Lack of knowledge about the benefits of

mousepad, upsurge in use of laptops with inbuilt touchpad and advancement in technology leading to manufacturing of mouse without a rubber ball limit the market growth. However, the usage of product continues to be undeniable and hence the market is expected to experience growth in the coming years.

The use of mouse makes it vulnerable to wear and tear so it should be carefully used to avoid any mishandling with the device. Mousepad helps the mouse by acting as a surface underneath and this safeguards the rubber surface to come in contact with rough or unsuitable surface. The mouse functions smoothly and accurately on the mousepad and the mouse used over mousepads are observed to work for longer duration than the mouse used without a mousepad. Although the increase in usage of technology has been avoiding the use of rubber ball in mouse. This is expected to hinder the market growth.

The mousepads are available for different applications such as gaming purposes or office use and in different types of materials such as cloth, silicon, plastics, and glass. This diversifies the scope of usability of mousepads in different areas of work.

Leading market players not only diversify the products to suit the consumer needs but also broaden the distribution channels to supply the product at consumer's convenience. This assists the market to flourish as the product is available in different offline as well as online stores. From choosing the right pick for your requirement to availing the best offers, the online stores are high in mass reach and allow customers to do first-hand comparisons. This improves the market leads for the mousepads.

Geographically Analysis - North America (U.S., Canada, and Mexico), Europe (Germany, UK, France, Italy, Spain, and Rest of Europe), Asia-Pacific (China, Japan, India, Australia, Malaysia, Thailand, Indonesia, and Rest of Asia-Pacific), LAMEA (Middle East, Brazil and Rest of LAMEA)

The key market players profiled in the report include Razer, RantoPad, Keycool, Newmen, SteelSeries, ROCCAT, IOne Electronic, Logitech, Corsair, Cherry, COUGAR, Bloody, Epicgear, Cooler Master

COVID-19 Scenario Analysis:

Disruptions in supply chains:

The supply chains have been significantly disrupted due to a lack of transportation and exchange of goods. This hindered the flow of supply of materials and goods that resulted in a contraction of the market for the pandemic period.
