

# Human Insulin Market 2021-26: Trends, Share, Scope, Growth, Opportunity

*IMARC Group expects the global human insulin market to grow at a CAGR of around 5% during 2021-2026.*

SHERIDAN, WYOMING, UNITED STATES, February 4, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group "Human Insulin Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", The [global human insulin market](#) exhibited moderate growth during 2015-2020. Looking forward, IMARC Group expects the market to grow at a CAGR of around 5% during 2021-2026.

Human insulin (HI) is a short-acting insulin that is synthesized in laboratories. Commonly utilized to mimic the function of natural insulin present in humans, it is bio-engineered by growing insulin proteins within E-coli bacteria (*Escherichia coli*). It is available as a solution and suspension and is required to be injected subcutaneously. It is widely employed for controlling the blood sugar levels of patients with type I and II diabetes.

HI functions by aiding the sugar produced by the human body to move from the blood to other body tissues where it is used for energy. It can additionally stop the liver from producing more sugar. Apart from this, HI also assists in inhibiting hepatic glucose production and improving the protein synthesis of the body.

## Market Trends:

The growing prevalence of obesity and diabetes among individuals due to sedentary lifestyles represents one of the key factors driving the market. Apart from this, there is a significant rise in the demand for biosimilar drugs on account of their cost-effectiveness and higher efficiency, which, in turn, is also supporting the growth of the market. Furthermore, the key players are introducing pen devices and safety pen needles for improved delivery of insulin to the body. This, in confluence with the increasing research and development (R&D) activities, is acting as another growth-inducing factor.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect

influence of associated industries. These observations will be integrated into the report.

Competitive Landscape:

The competitive landscape of the market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

B. Braun Melsungen AG  
Becton Dickinson & Company  
Biocon  
Eli Lilly and Company  
Julphar  
Novo Nordisk  
Pfizer  
Sanofi  
Sedico  
Wockhardt  
Ypsomed Holding, etc.

The report has segmented the market on the basis of Product Type, End-User and Region.

Breakup by Product Type:

Drugs  
Human Insulin Analogs and Biosimilars  
Rapid Acting  
Long Acting  
Premixed  
Human Insulin Biologics  
Short Acting  
Intermediate Acting  
Premixed  
Delivery Devices  
Pens  
Reusable Pens  
Disposable Pens  
Pen Needles  
Standard Pen Needles  
Safety Pen Needles

Syringes  
Others

Breakup by Distribution Channel:

Retail Pharmacies  
Hospital Pharmacies  
Online Retail Stores  
Others

Breakup by Disease Type:

Type I Diabetes  
Type II Diabetes

Market Breakup by Region:

North America (United States, Canada)  
Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, Others)  
Europe (Germany, France, United Kingdom, Italy, Spain, Russia, Others)  
Latin America (Brazil, Mexico, Others)  
Middle East and Africa
