The easy availability of affordable flights and better connectivity of airports are driving the aviation lubricants market. In addition to this, airlines are expanding their operating hours and commercial fleets, particularly in emerging economies, to increase profitability, which is also escalating the sales of aviation lubricants across the globe. Besides this, the growing utilization of synthetic lubricants as they ensure thermal stability and offer better performance in extreme weather conditions is further propelling the market growth. Additionally, the escalating need to enhance the fuel economy, stringent fuel emission norms, and the increasing air passenger traffic are projected to bolster the aviation lubricants market in the coming years.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Competitive Landscape:

- Aerospace Lubricants Inc.
- Eastman Chemical Company

- Exxon Mobil Corporation
- Whitmore Manufacturing LLC
- Anxess AG
- ukoil
- lyco
- Nye Lubricants Inc
- Fuchs Petrolub SE)
- Rocol (Illinois [Tool](#) Works Inc.)
