

Global Dental Implants Market Trends, Key Players and Value is expected to Record US\$5.71 billion in 2026

PUNE, MAHARASHTRA, INDIA, February 4, 2022 /EINPresswire.com/ -- The global [Dental Implants Market](#) is expected to record a value of US\$5.71 billion in 2026, rising at a CAGR of 6.53%, for the time period of 2022-2026. Factors such as increasing geriatric population, growing concern for oral healthcare, expansion of dental service organizations, rising

preference for cosmetic dentistry and surging focus on edentulous treatment would drive the growth of the market. However, the market growth would be challenged by a shortage of trained dentists and dental hospitals, high cost of dental implant treatment & reimbursement issues and greater risk of tooth loss associated with dental bridges. A few notable trends include increasing spending on dental services, accelerating penetration of digital dentistry, growing application of CAD/CAM technologies and advancements in implant technology in developed countries.

The global dental implants market has been segmented on the basis of material, product and design. On the basis of material, the global market can be bifurcated into Titanium implants, zirconium implants and other implants made of materials such as ceramic and porcelain fused to metal. In terms of the product, the global dental implants market can be divided into endosteal implants, subperiosteal implants, transosteal implants and others. Whereas, the market is divided into Tapered implants and parallel walled implants, in terms of design.
