

# Aircraft Arresting Systems Market Analysis, Post COVID-19 Scenario And Leading Players Updates By Forecast 2020-2030

---

*Aircraft arresting system market (products, applications & geography). This study presents market analysis, trends, and future estimations.*

PORTLAND, ORAGON, UNITED STATES, February 4, 2022 /EINPresswire.com/ -- [Aircraft Arresting Systems Market](#) Outlook – 2027

Aircraft arresting system is used to decrease the speed of an aircraft at the time of landing. Aircraft arresting systems absorb the momentum of the aircraft to stop aircraft in various circumstances such as in regular landing, in emergency landing, and during the aborted take off. The aircraft arresting systems are broadly categorized into three types: aircraft arresting barriers, aircraft arresting cables, and engineered material arresting systems. Engineered material arresting system (EMAS) is used at commercial airports, while aircraft arresting barriers & aircraft arresting cables are military systems used for tactical aircrafts such as fighter aircraft. Aircraft arresting systems can be fixed in a runway or can be portable in nature, depending on its use. Aircraft arresting systems increase safety of passengers & pilots by assisting in secure aircraft landing.

Companies covered: General Atomics., Safran, SCAMA AB, Aries S.A., A-Tech Inc., A-laskuvarjo, QinetiQ North America, Curtiss-Wright Corporation, Wire Rope Industries, and WireCo® WorldGroup

COVID-19 scenario analysis:

Due to COVID-19 situation, the R&D in aircraft arresting systems has been hampered due to the declared lockdowns and government restrictions on public gatherings.

Supply of aircraft arresting system parts such as arresting gear and related components have been adversely impacted due to COVID-19.

Travel restrictions and reduction in military activities due to COVID-19 has also adversely effected growth of global aircraft arresting systems market, as aircraft arresting system is also used in

CATOBAR and STOBAR aircraft carriers.

Demand may rise extensively in global aircraft arresting systems market in upcoming quarter as industry's production has started to get momentum after tough phase of COVID-19.

Top impacting factors: market scenario analysis, trends, drivers and impact analysis

Increase in spending on runway safety, advancement in arresting gear technologies, increase in use of arresting systems in naval carriers, and growth in installation of EMAS at airports are some of the major factors that drive the growth of the global aircraft arresting systems market. However, high costs involved in development & maintenance of aircraft arresting system is restraining the growth of the aircraft arresting systems market. Contrarily, increase in use of aircraft arresting gears in unmanned aerial vehicles (UAVs) is expected to further boost the demand for aircraft arresting systems in the future.

Growth in installation of EMAS

An aircraft overrun occurs when an aircraft is unable to stop within the runway design length. Hence, to prevent such situations, several regulatory authorities have instructed to use engineered material arresting system (EMAS) at airports. For instance, federal aviation administration (FAA) has made the installation of EMAS compulsory to all the airports in the U.S., which have insufficient runway safety length of 305 m or 1000 feet. Moreover, countries such as Germany & China are also installing EMAS at airports to prevent aircraft overrunning runways. Hence, growth in use of EMAS at airports is expected to generate significant demand in the global aircraft arresting systems market.

Key benefits of the report:

This study presents the analytical depiction of the aircraft arresting systems industry along with the current trends and future estimations to determine the imminent investment pockets.

The report presents information related to key drivers, restraints, and opportunities along with detailed analysis of global aircraft arresting systems market share.

The current market is quantitatively analyzed from 2020 to 2027 to highlight the global aircraft arresting systems market growth scenario.

Porter's five forces analysis illustrates the potency of the buyers & suppliers in the market.

The report provides a detailed global aircraft arresting systems market analysis based on competitive intensity and how the competition will take shape in coming years.

Questions answered in the aircraft arresting systems market research report:

Which are the leading market players active in the global aircraft arresting systems market?

What are the current trends that will influence the market in the next few years?

What are the driving factors, restraints, and opportunities in the market?

What are the projections for the future that would help in taking further strategic steps?

## About Us

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domain.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
