

High Performance Flooring System Market size is estimated to reach USD 15.29 Billion in 2028 | Reports And Data

Increasing use of heavy-duty flooring materials in various industrial and commercial facilities is a key factor driving market revenue growth

NEW YORK CITY, NY, UNITED STATES,
February 4, 2022 /EINPresswire.com/ --

According to the latest report by Reports and Data, The global [High Performance Flooring System Market](#)

size is expected to reach USD 15.29 Billion in 2028 and register a revenue CAGR of 5.7% over the forecast period. Rapid urbanization and increasing construction activities globally are driving market revenue growth.

A high-performance flooring system is used in indoor flooring due to its high strength and durability. It is mainly used in commercial buildings and luxury residences. Extensive implementation of heavy-duty flooring materials in various end-use applications is driving the growth of the high-performance flooring system market. Additionally, rapidly growing commercial and residential construction and expansion of various end-use industries across the globe are driving market revenue growth.

Increasing interest in sports and fitness, the emergence of gyms and sports centers is creating a high demand for robust and long-lasting floors with aesthetic appeal. The need for recreation centers for engagement, wellness, and community requirements for both staff and users are contributing to the revenue growth of the market.

Market Dynamics

The global chemicals and materials have a wide range of application areas such as crop protection, animal nutrition, dietary supplements, preservatives, flame retardants, surface ingredients, active pharmaceutical ingredients, and matting agents among others. Population explosion along with rapid economic growth is expected to propel market growth. Moreover, the

Reports And Data

growing urbanization, rapid industrialization, and high investment in infrastructure development create market demand over the forecast period.

Competitive Landscape:

The global High-Performance Flooring System market research report provides a competitive strategy analysis portfolio to provide a better understanding of the competitive landscape. The report further discusses in depth the business strategies undertaken by key manufacturers on mergers and acquisitions, joint ventures, and collaborations. It sheds light on the companies holding the largest market share in terms of revenue in the global High-Performance Flooring System market.

Some major companies profiled in the global market report are Mannington Mills, Inc., Polyflor Ltd., Gerflor, Tarkett S.A., Stonhard, Surface Solutions, Cornerstone Flooring, Fosroc, Inc., RPM International Inc., and VIACOR Polymer GmbH.

Some Key Highlights From the Report

In September 2021, Diversify expanded its high-performance flooring portfolio with the addition of Epoxy Systems International. Epoxy Systems International has technical expertise and experience to match Diversify's safety, quality, and performance values.

Epoxy flooring provides high-quality professional-grade characteristics such as high resistance from water and heat. Epoxy is one of the most extensively used flooring incorporated in automotive industries and garages for its superior resistance against gasoline, oil, transmission fluid, bleach, cleaners, and others. Also, its high longevity, anti-fatigue properties, and hassle-free installation with flawless, elegant shine make it ideal for commercial, as well as residential use.

Market in North America accounted for a steady revenue share in 2020, attributed to the expansion of the wood flooring industry in the U.S. and increasing demand for high-performance hardwood flooring in residential and commercial buildings. In addition, the presence of retailers such as Home Depot and Lowes and leading manufacturers such as Mannington Mills, Inc. is anticipated to propel market revenue growth.

The concrete segment accounted for a steady revenue share in 2020. Concrete materials are cost-effective, extremely tough, and highly durable and are used in most high-performance industrial subfloor systems. These floors are suitable for application in a wide variety of factories with high precisions in desired design and appearance.

The industrial segment accounted for a significant revenue share in 2020 as high-performance flooring is incorporated for heavy-duty operations in industrial premises such as workshops,

packaging areas, welding areas, manufacturing facilities, loading docks, warehouses, and foundry shops.

About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients to make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, TouchPoints, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provide our clients with the ability to secure an edge over their respective competitors.
