

Cardiovascular Ultrasound Market: Walking can cut risks of cardiovascular death

The global cardiovascular ultrasound market is segmented on the basis of test type, technology, device display, end user, and region.

PORTLAND, OREGON, UNITED STATES, February 4, 2022 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "[Cardiovascular Ultrasound Market](#) by Test Type (Stress Echocardiogram, Transthoracic Echocardiogram, Fetal & Intracardiac Echocardiogram, and Transesophageal Echocardiogram), Technology (2D, 3D & 4D, and Doppler Imaging), Device Display (Color Display and Black & White (B/W) Display), and End User (Cardiology Centers, Hospitals, Home Care, and Ambulatory Centers) - Global Opportunity and Industry Forecast, 2020-2030". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

Cardiovascular ultrasound is a noninvasive medical procedure used to diagnose functioning of heart with the help of high-frequency reflected sound. In the procedure, a transducer (such as a microphone) is used to direct out ultrasonic sound waves at a high inaudible frequency. When the transducer is positioned on the chest at specific locations and angles, the ultrasonic sound waves penetrate through the skin and other body tissues to the heart tissues, and get reflected by the heart structures. These sound waves are then subsequently directed to a computer, creating moving images of the heart walls and valves.
